I feel ashamed I had to search this up

'Wagoner's Hitch' | How to Tie a Trucker's Hitch' by Jason's Knot Channel Length:118 Number of Comments:3

From KevoyCarabreno

You really should include the auto-lock, just wrap the loop at 0:36 (backwards, to YOUR right) around the rope coming from the tree which you have draped in front of the loop.

From JasonsKnotChannel

The "auto-lock" doesn't actually lock anything and also doesn't work with all types of rope. It's a nice gimmick though.

From kadew

(autolock - so called also removes most of the mechanical advantage.. - the simple 'sheepshank truckies' / wagoners hitch is easily cascaded if the first is tied high enough giving a 4:1 theoretical advantage in 2 stages - and it is easily released after being tight for any length of time.)
